

# Unwire.

Connecting you to your guests with wireless Internet access

**High quality, high speed wireless Internet you *and* your guests can rely on.**

## **No-hassle installation**

Incipient makes the setup process simple and easy by performing all stages of the installation. We will procure the necessary equipment, data services and materials. Taking the hassle out of providing wireless Internet is our primary focus, saving you time and resources to conduct your business without added frustration.

## **Simplifying customer access**

Using wireless Internet has become even easier for your guests through our homepage redirection; there's no software to install or provide. The user experience is as simple as opening their Internet browser, and logging on. Incipient provides a quality service that is simple to use, secure and stable.

## **Better than broadband**

Your guests will benefit from always-on network they can trust and gain from the ability to utilize a large and growing number of locations where Incipient's Internet access already exists. Whether it's in their room, by the pool or across town, mobility and value is what your customers will receive.

## **Beyond Internet access**

Incipient is a full service Wireless integrator and service provider. We offer flexible, fully customizable solutions that allow you to determine the best type of service for your guests. Service offerings range from complimentary to pay-per-use and everything in between. Your guests expect the best service available and Incipient can help you meet their demand.

Take a walk on the wireless side with

# Incipient Wireless Internet Access

## Quick Facts:

- Wi-Fi operates safely at a power output of less than one-sixth that of a cell phone
- Utilizing advanced wireless technologies, coverage can extend from a few hundred feet to several city blocks
- The number of wireless users has increased by over 220% in the past year and is expected to double again by the end of 2005
- Incipient wireless provides data speeds over 50 times faster than a standard dial-up connection and up to twice the speed of other wireless broadband connections
